

# Make Term Deposits Great Again

**IMPERIUM MARKETS**

# Australia's only licensed marketplace for Term Deposits

ASIC requirement **“the obligation to do all things necessary to ensure that the market is fair, orderly and transparent”**

Imperium Markets is a financial technology company (FinTech) founded by financial markets practitioners in December 2016 with the objective to transition the wholesale deposit and fixed interest market to a platform.

Where other markets such as equities, commodities, futures, derivatives and foreign exchange have transitioned to platform trading, the deposit market, to a large extent still transacts with each other via phone and email. Investor portfolios and bank operating systems often consist of spreadsheets and technology which is outdated or lacking in useful functionality.

Imperium Markets' technology was designed to transition the whole of the market to platform trading.

## EFFICIENT

Imperium's investment platform automates many processes for debt markets, including investing, portfolio management, forecasting, valuations and settlement.

## TRANSPARENT

More readily available market pricing and no brokerage, so you can always achieve best execution rates, with all offers audit trailed and available for analysis.

## COMPLIANT

Imperium offers both pre-trade and post trade compliance for your portfolio and trades. Never breach your investment mandates again.

## INFORMED

Returns on investment are improved by gaining access to Imperium's market data, either via our platform reporting or via our API for your 'big data' analysis.

## REPORTABLE

Meet all of your statutory obligations for monthly and annual reporting using data and visuals sourced directly from the Imperium platform.

## SECURE

Imperium data is stored according to world's best practice by the world's data security experts.
