

PROMASTER

ProMaster Expense Management for Local Government

ProMaster is a centralised, user-friendly SaaS (Software-as-a-Service) solution to manage corporate card reconciliation and out-of-pocket reimbursement.

Increase employee productivity in the finance department by placing the responsibility back on the cardholder to code and manage their own receipting. An easy-to-use yet powerful tool, ProMaster will reduce the time spent capturing coding and GST, and improve your audit capabilities.

Latrobe City Council Case Study

8 – 191 cards in 12 months.

Process cost dropped from \$120 to \$20 per transaction/invoice.

“We have a job to deliver services to the community and we don't want our staff to be tied up with administration. With ProMaster and the new card program, ultimately the community benefits.”

– **Rachael Mayes**
Financial Accounting Officer

Visibility

A direct data feed from your card provider means transactions are visible within 24-48 hours of incurring an expense.

Integration Capabilities

ProMaster is designed to integrate with your existing systems seamlessly, including ERPs, AP, Payroll, business intelligence tool and more.

Spend Reporting

Get visibility of employee initiated spend with a complete suite of standard and configurable reports. You can drill into card spend by merchant groups, GL segments, users and more.

Mobile App

There is a companion mobile app to allow end users to capture, code and approve on-the-go.

Control & Audit

ProMaster maintains a full audit log of all actions in the system including approvals. Business rules can also be set up to alert inappropriate spend.

Secure Hosting

Your data is secure and kept in Australia for 7 years at no added cost. Inlogik is PCI DSS compliant and ISO 27001 certified.
